Summary of Pitch

Our project aims to create a palm reading application that offers fortune telling services based on the user's palm features. Palm reading is an ancient practice that involves analyzing lines and other features on the palm of the hand to make predictions about user's life, near future, lucky number etc. Many people from different cultures seek out palm readings for various reasons, such as curiosity, entertainment, or guidance when making important decisions.

Our application is an interactive palm reading application that enables users to select answers based on displayed images and questions. In addition to the lines, the app will also take hand shape, length and hand mouth into consideration for fortune telling.

This application will provide users with a convenient and accessible way to do palm readings.

History of Palm Reading

- Palm reading has been used by many cultures such as Sumeria, Babylonia, Arabia, Canaan, Persia, India, Nepal, Tibet, and China
- Originated simultaneously in two places:
 - Hindu astrology: sage Valmiki wrote a book on it
 - Greece: practiced by Anaxagoras
- Two types of palm reading:
 - Chiromancy (focuses on lines of the palm)
 - Chiromancy (examines shape, color, and texture of palm, fingers, and thumb)
- Different versions can have contradicting rules
- 1839: palmistry revived by Captain Casimir Stanislas D'Arpentigny when he published a book called "La Chiromachie"
- 1970: Parker Brothers created a board game called "Touch-Game of Palmistry" in which people could explore palm reading.

Statement of Purpose/What is Special

Fortune Telling and Future Prediction

The purpose of this project is to develop an interactive and user-friendly palm reading application that makes palmistry and fortune telling accessible to a wide audience. Providing users personalized insights into their near future and fortunes by guiding them through our process of palm reading. And also will promote their curiosity and engagement with the ancient practice of palm reading.

User Stories

Ana

25, Midwest US.
Works in retail and
plans to move to
the west coast.

*As a person interested
in spirituality, astrology,
or practices similar to
them, I want to
experience different
forms of personal
exploration, so that I
can learn more about
myself and who I am.*

Matthew

20, East US. Just
transferred to
UCSD for ICAM.

*As a person going
through a tough time in
my life, I want to
explore myself and
what my future holds
for me, so that I can
receive positive
affirmations and be
optimistic to the future.*

Ynna

21, Colorado. Yoga
instructor and cat
enthusiast. Gives
talks on leadership.

*As a person invested
into palm reading, but
doesn't have access to a
close one, I want to try
palm reading through
an app, so that I can be
on the go and get a
palm reading before I
do some important
events.*

Ricky

21, Colorado. Yoga
instructor and cat
enthusiast. Gives
talks on leadership.

*I just watched the Lion
King, it was super cool! I
want to try Lion King
apps so that I can have
different forms of
entertainment to enjoy
the movie. I love
Pumba, he's so funny!*

Basic Functionality/Features

How the app instructs users to input information on their hand shape, length, and hand mouth. You can also show some examples of different hand features and how they affect the feedback.

Illustrate how the app analyzes the input and generates a customized feedback regarding the user's near future and fortune. Show how the app reads the feedback by voice and allows sharing the answer through a button.

Basic Functionality/Features

Users pick a minimum amount of lines to get a fortune output.

After picking a minimum amount of lines, a prompt will appear asking if the user wants to read their fortune now or if they want to pick more lines.

Basic Functionality/Features

Highlight how users can revisit the app multiple times, as palm lines change over time, enabling them to stay informed on their upcoming fortunes and events.
